

# CISO Says

*with Terry Grogan*

## IT'S NOT JUST PHISHING ANYMORE...

BE AWARE OF FAKE CALLS AND TEXTS

Vishing and Smishing... the art of tricking you by use of a phone call or text...

### FOLLOW THESE TIPS TO STAY SAFE:

**Don't respond to unknown texts** – Contact tracing messages; requests for political opinions - don't respond, not even to tell them to stop

**Don't click on links in texts** – These often point to malicious sites

**Don't give out personal information over the phone** – It doesn't matter what the person knows about you. If the call is unsolicited hang up!

**Feel threatened by the call or text** – Report it to your local authorities

### REMEMBER...

## NEVER GIVE INFORMATION TO AN UNKNOWN SENDER

If you think the text or call might be legitimate, contact the “agency” another way. Don't call the user or text back.

# PROTECT YOURSELF.
